Taking into consideration the company's financial position and level of earnings, the Board of Directors proposes that the Annual General Meeting on May 12, 2026, resolves to pay a dividend of SEK 5.60 per share, corresponding to a total dividend of approximately SEK 431 million¹⁾. The dividend is proposed to be distributed in two equal installments, with a payment of SEK 2.80 per share on each payment date. As record dates for the right to receive dividends are May 15, 2026, with expected distribution to shareholders on May 20, 2026, and November 3, 2026, with expected distribution on November 6, 2026.

The objective of the Board of Directors is that the dividend should correspond to at least 40 percent of the company's net profit after tax, taking into account the company's financial position, acquisition opportunities and long-term financing needs. The dividend policy aims to create a balance between the shareholders' interest in receiving long-term return and the financial flexibility required for Lindab Group to continue investing in its strategy. The proposed dividend is consistent with the Group's dividend target.

The restricted equity is fully covered after the proposed dividend. Proposed dividend amounts to 12 percent of the company's equity and 6 percent of the consolidated equity of the Group. After the distribution of the dividend, the company's and the Group's equity/asset ratios are approximately 100 and 49 percent respectively.

The company's and the Group's equity/asset ratios are considered to be fair compared to the industry. The Board of Directors assesses that the company and the Group will be able to assume future business risks and can be expected to fulfill their short-

respectively long-term obligations. The dividend will not have a detrimental impact on the company's capacity to make required investments.

The Board of Directors finds that the proposed dividend is justifiable considering the requirements the nature, scope and risks of the operations pose on the size of the company's and the Group's equity as well as the company's and the Group's consolidation requirements, liquidity and position in general.

1) Presented dividend of SEK 431,401,219 is calculated based on number of outstanding shares on February 12, 2026. In terms of treasury shares, of which the exact number will be identified at each record date, these are not conveyed any entitlement to dividend. The number of treasury shares amount to 1,806,888 shares.
